

Phoenix Fire Request To Build Out UTAC Channels

Presentation to SIEC

Captain Mike Worrell, Phoenix Fire Department

June 21, 2011

Public Safety Interoperable
Communications Office

Background

- The EMSCOM system will no longer be utilized in the Phoenix Metro area.
- The equipment is capable of being converted to transmit/receive the National Interoperable UTAC channels.
- Phoenix Fire, DPS and the Channel Plan Workgroup are all in agreement that this will enhance our interoperable capability and there are no conflicts with existing infrastructure.

Request

- Phoenix Fire plans to build out the equipment to support the following channels:

NAME	RX FREQ MHz	TX FREQ MHz
UTAC41	453.4625	458.4625
UTAC41D	453.4625	453.4625
UTAC42	453.7125	458.7125
UTAC42D	453.7125	453.7125
UTAC43	453.8625	458.8625
UTAC43D	453.8625	453.8625

- Phoenix Fire has requested an approval letter from the SIEC for submittal to the City of Phoenix IT Department for the desired use of the UTAC frequencies.

Questions/Discussion

&

Possible Approval

Thank you!
